- Collaborated with designers and backend developers to deliver seamless end-to-end solutions, meeting tight deadlines.

### **Malicha, Website Manager & Product Designer**

09/2023 – 01/2025 | Nigeria

Malicha is a book publishing company that provides services, expertise and products focused on helping authors, readers, and leaders. At Malicha, I did the following tasks;

- Designed and developed the Malicha publishing platform using **Orlit Building Platform**
- Managed the website's performance, SEO optimization, and content updates.
- Enhanced **UI/UX design** to improve user engagement and conversion rates.
- Worked closely with content creators and managers to ensure a visually appealing and user-friendly experience.
- Implemented Google Analytics to monitor user behavior, track KPIs, and optimize website performance based on data insights.
- Analyzed traffic trends and provided actionable recommendations to clients

### **Ehealth4everyone, Product Designer**

Nigeria

eHealth4everyone (e4e) is a health-tech company that provides services, expertise and products focused on making the business of healthcare delivery work for everyone, through technology-enabled optimizations. At E4e, I did the following tasks;

- Led design team training sessions and collaborated closely with product, project management, and cross functional teams.
- Worked with PMs on URDs, documented UI/UX for e4e products
- Compiled monthly NHMIS bulletins and created Google Analytics reports for MSDAT.
- Carried out research for products and compiled design team monthly reports.
- Designed mock-ups and updates for e4e products, conducted usability tests, and created reports.

## Projects

### **Buy With Ease, Women Techsters Fellowship Capstone Project, Frontend Developer**

Buy With Ease is an online shopping platform focused on small and medium enterprise owners. I did the following:

- Collaborated with product design team and cross-functional teams to design and develop innovative products.
- Lead the design and development of a responsive web application
- Conducted user research and developed user personas to inform design decisions.
- Utilize modern JavaScript frameworks (ReactJS) to build dynamic and interactive user interfaces.

### **Paws & Purrs, HNG Internship, Frontend Developer**

- Designed and developed a pet adoption and care platform using **React and Tailwind CSS**, enhancing user experience for pet lovers and shelters.
